

WHO WE ARE

Nuve is a global technology leader accelerating the electrification of transportation through its proprietary vehicle-to-grid (V2G) platform. Our mission is to lower the cost of electric vehicle ownership while supporting the integration of renewable energy sources, including solar and wind. Our GIVE™ platform enables our customers (fleet and building managers, municipalities, and public organizations such as school districts) to transform their EVs into grid-integrated energy storage resources when those vehicles are plugged in, while guaranteeing the expected level of charge at the time the driver needs it for transportation.
