

Turn your EV fleet into a virtual power plant

Nuve's Grid Integrated Vehicle (GIVE™) technology is a cloud-based platform that enables intelligent, bidirectional, vehicle-to-grid (V2G) charging. With GIVE™, individual and fleet electric vehicles (EVs) are transformed into reliable, distributed energy storage resources that can provide grid services, vehicle-level services, and grid-connected building load management. Smart charging ensures that every EV is charged and ready to drive when needed.

HIGH LEVEL OF CONTROL

- Integrates variable sized resources (KWh)
- Independent control of each asset (EV)
- Second-by-second control

VERSATILE INTEGRATION

- Third party integrations with existing systems including EVSEs, OEMs, and utilities
- Secure REST API available
- Support for multiple communication protocols

MOBILE MANAGEMENT*

- Set charge levels and enable last-minute charging remotely
- Available as a mobile app and web interface

PERFORMANCE INSIGHTS

- 24/7 dashboard view of EV usage and charging
- Live energy delivery performance reporting
- Custom reports

Drivers can adjust charge needs on the go*

Monitor your entire fleet with the Nuvve dashboard

*Coming soon for the U.S. market

How GIVe™ works

ELECTRIC VEHICLE

NUVVE AGGREGATION

ENERGY TRANSFER

PROVEN TECHNOLOGY

- Over 10+ years of V2G deployments across 5 continents
- Experience controlling 10K+ EVs at once
- Highly flexible integrations

SECURITY FEATURES

- Secure onboarding of charging assets and role-based access controls
- End to end encryption using industry security standards
- PKI-based authentication
- API access through secure https

Contact us to get started today

- Full V2G offering including EVSE
- Custom integration of GIVe™ platform integration with existing or new EVSE.
